Professional Summary

With 18 years of extensive experience in cloud computing, artificial intelligence, and data analytics, I am a seasoned IT professional dedicated to facilitating business digital transformation and innovation. My expertise lies in delivering robust solutions that significantly enhance efficiency, productivity, and customer satisfaction. As a passionate speaker, educator, and mentor, I am committed to sharing my knowledge while continually advancing my skills to remain an invaluable asset to my company and clients.

-

Professional Experience

Microsoft

Account Technology Strategist / Cloud Solutions Architect

October 2019 - Present

- Guided enterprise customers through their digital transformation journeys by deeply understanding their business challenges, opportunities, and industry best practices.
- Collaborated with clients to create visions and strategies that align their goals with Microsoft's offerings, showcasing products and services that can transform business processes, empower employees, engage customers, and optimize operations.

- Developed and managed cloud computing solutions, drove cultural change, coordinated cloud architecture, and ensured alignment with business outcomes.
- Specialized in cloud-native application development, DevOps, CI/CD, containers, microservices, and API management.

Key Projects:

- Learning Management System for K1-12
- Grading System for K1-12
- COVID Monitoring and Vaccine Tracking
- Business and Licensing Permit System
- Government Web Hosting
- Wage Subsidy App during COVID
- First major AI (Azure OpenAI) use cases in the Philippines
- Creating AI strategic plans for major customers
- Creating Security strategic plans for major customers
- Creating digital transformation roadmap and strategy for major customers

AXA Global Operation

Solutions Architect

February 2018 – October 2019

- Developed and implemented advanced systems across various APAC branches, including Singapore, Malaysia, the Philippines, Thailand, and Hong Kong.
- Utilized Enterprise Content Management (ECM) systems such as FileNet, OnBase, and Documentum, as well as Customer Communication Management (CCM) platforms like Exstream, Thunderhead, and Inspire.
- Leveraged Business Process Management (BPM) tools including Pega, Webmethod BPMS, Camunda, and OnBase to streamline operations and enhance efficiency.

Key Projects:

- Data Lake for AXA SG & AXA Thailand: Spearheaded the design and implementation of a comprehensive Data Lake solution, centralizing data storage and improving data accessibility and analytics capabilities.
- Cloud Migration Framework for AXA GO: Developed a robust cloud migration framework that facilitated the seamless transition of AXA GO's infrastructure to the cloud, ensuring minimal disruption and enhanced scalability and security.
- Content and Process Management Migration for AXA: Led the migration of content and process management systems to more advanced platforms, streamlining workflows, and improving information governance and compliance.

RCG Global Services

Solutions Architect / Technical Lead / Full Stack Developer

September 2009 – February 2018

- Built and migrated multiple websites using a range of cutting-edge technologies for Walt Disney Parks and Resort Online (WDPRO).
- Worked extensively with both front-end and back-end development, employing frameworks like AngularJS and React for the front-end, and Node.js and Python for the back-end.
- Integrated third-party APIs and ensured seamless data flow and user experience across all platforms.
- Collaborated closely with cross-functional teams located in Orlando, FL, and Manila, requiring excellent communication skills and the ability to work effectively in a distributed team environment.
- Led numerous projects from inception to completion, ensuring that all deliverables met the high standards expected by WDPRO.

Key Projects:

- Developed numerous applications for Disney, with some of the key projects listed below:
 - Disney Vacation Club (<https://disneyvacationclub.disney.go.com/>)
 - Disney Wedding (<https://www.disneyweddings.com/>)
 - Disney Golden Oak (<https://www.disneygoldenoak.com/>)
 - Disney Main Website (<https://disneyworld.disney.go.com/>)
 - Disney Travel Agents (<https://www.disneytravelagents.com/>)
 - Disney Cruise Line (<https://disneycruise.disney.go.com/>)

GoAdv (now Populis)

Technical Lead / Full Stack Developer

September 2008 - September 2009

- Led a team of developers in creating innovative web solutions, significantly improving the company's online presence and user engagement.
- Designed architecture, wrote clean and efficient code, and ensured the scalability and security of web applications.

- Optimized website performance and enhanced user experience, resulting in a substantial increase in user satisfaction and retention.
- Mentored junior developers, conducted code reviews, and provided guidance on best practices and industry standards.

The Design People

Senior Full Stack Developer

March 2007 – September 2008

- Built and updated over 500 websites for real estate clients, coordinating closely with Project Managers in Los Angeles, CA.
- Gathered and analyzed client requirements, designed user-centric interfaces, and implemented full-stack solutions that were both scalable and maintainable.
- Optimized websites for performance and SEO, helping clients achieve better visibility and higher traffic.
- Streamlined the development process by automating repetitive tasks and implementing best practices in version control and continuous integration.
- Mentored junior developers, fostering a culture of continuous learning and improvement within the team.

iWebmaster

Senior Full Stack Developer / Junior Full Stack Developer

February 2005 – March 2007

- Managed over 50 web applications, working directly with clients to identify needs and deliver tailored solutions.
- Collaborated closely with cross-functional teams, including designers, project managers, and testers, to ensure that project objectives were met within the stipulated timelines.
- Implemented best practices in coding standards, version control, and continuous integration, significantly enhancing the team's productivity and the quality of the deliverables.

- Mentored junior developers, providing guidance and support to help them develop their technical skills and adhere to high coding standards.

-
