SUMMARY

I am a seasoned IT professional with 18 years of experience and expertise in cloud computing, artificial intelligence, and data analytics. I help businesses achieve their digital transformation and innovation goals by delivering solutions that enhance efficiency, productivity, and customer satisfaction. I share my knowledge and passion with others through speaking, teaching, and mentoring. I am always eager to learn new skills and technologies that can make me more effective and valuable for my company and clients.

WORK EXPERIENCE

October 2019 - Present

Account Technology Strategist / Cloud Solutions Architect
Microsoft

As an Account Technology Strategist (ATS), I guide enterprise customers through their digital transformation and innovation journey. I understand their business challenges and opportunities, as well as their industry landscape and best practices. I collaborate with them to create a vision and a strategy that aligns their goals and priorities with Microsoft's and its partner's offerings. I showcase Microsoft's portfolio of products and services that can enable them to transform their business processes, empower their employees, engage their customers, and optimize their operations.

As a Cloud Solutions Architect, I develop and manage cloud computing solutions for customers. I function as a cloud subject matter expert who leads cultural change, coordinates cloud architecture, develops cloud solutions and aligns customer needs with business outcomes. I provide initiative-taking support, collaboration with multiple teams, drive innovation, and share intellectual property. I have expertise in cloud-native application development, DevOps, CI/CD, containers, microservices, API management, and other modern software techniques.

I have successfully delivered projects for the Philippines such as:

- Learning Management System for K1-12
- Grading System for K1-12
- COVID Monitoring and Vaccine Tracking
- Business and Licensing Permit System
- Government Web Hosting
- Wage Subsidy App during COVID

February 2017 – October 2019

Solutions Architect

AXA Global Operation

As a Solutions Architect (Generalist) at AXA GO, a team that served APAC AXA branches such as Singapore, Malaysia, Philippines, Thailand, and Hong Kong, I created and implemented systems for various domains using different technologies such as ECM (Filenet, OnBase, Documentum), CCM (Exstream, Thunderhead, Inspire), BPM (Pega, Webmethod BPMS, Camunda, OnBase), Datalake / Big Data (AWS EMR, Azure Databricks & HDinsight), Cloud Platforms (AWS and Azure), RDS (Oracle / Oracle RAC) and NoSQL (MongoDB, DynamoDB and CosmoDB).

I reviewed and explained detailed business requirements specifications (BRS) to ensure that the solutions I delivered aligned with the customer expectations and the current or future ICT capabilities. I contributed to the enterprise architecture strategy and helped to prioritize technology investments that maximized the return on investment. I established and designed technology solutions within the agreed enterprise architecture framework and supported the business in achieving their objectives. I followed a rigorous development, testing, and implementation process and reported on the progress and outcomes of my projects. I developed and executed a cloud strategy that supported the business needs and goals. I assessed and chose cloud applications, hardware, and software that met the quality and performance standards. I built and managed cloud systems using various cloud services and tools. I collaborated with IT security to monitor and ensure the compliance of cloud systems with security policies and regulations. I addressed technical issues related to cloud systems in a prompt and professional manner. I offered guidance and support in moving infrastructure and applications into the cloud using efficient techniques.

Some of the projects I worked on are:

- Data lake for AXA SG & AXA Thailand
- Cloud Migration Framework for AXA GO
- Content and Process Management Migration for AXA

September 2009 – February 2017

Solutions Architect / Technical Lead / Full Stack
Developer

RCG Global Services

From 2009 to 2018, I had different roles at RCG Global Services: full-stack developer, technical lead, and solutions architect. My main client was Walt Disney Parks and Resort Online (WDPRO), and I built and moved websites using various technologies for them. I went back and forth between Orlando FL and Manila Philippines to work with my team on the projects. My skills include cloud applications, cloud computing, solution architecture, microservices, containerization, DevOps and BDD. I used various tools and frameworks such as MEAN stack, LAMP stack, PHP, Javascript, Java, CSS, Maven, Ant, NPM, Grunt & Gulp.

Some of the websites I worked on are:

- <https://disneyvacationclub.disney.go.com/>
- <https://www.disneyweddings.com/>
- <https://www.disneygoldenoak.com/>
- <https://disneyworld.disney.go.com/>
- <https://www.disneytravelagents.com/>
- <https://disneycruise.disney.go.com/>

February 2009 - September 2009

Technical Lead / Full Stack Developer

GoAdv

At Populis (formerly GoAdv), a global online publisher that produces content for 550 websites and blogs in eight languages, I was a full-stack developer. I used LAMP stack (Linux, Apache, MySQL and PHP) with frameworks such as Code Igniter and Joomla, JavaScript with libraries such as jQuery and tools such as QUnit and PhantomJS, Java with BDD (JBehave), Spring and JUnit, CSS with Bootstrap, SVN for version control and FBML for Facebook applications to build various Facebook applications, internal applications, marketing applications and blog sites for them.

March 2007 – February 2009

Senior Full Stack
Developer

The Design People

I worked as a Programmer on Custom projects, where I built and updated more than five hundred websites for different real estate customers. I communicated with Project Managers in Los Angeles, CA to figure out their requirements and provide solutions using PHP (Core), JavaScript (jQuery, YUI & EXTJS), CSS2 and HTML 4.

February 2005 – March 2007

Senior Full Stack Developer / Junior Full Stack Developer

iWebmaster

Oversaw more than 50 web projects from start to finish using PHP, Javascript, CSS and HTML. Worked with clients to identify needs and provide solutions. Headed a team of five web experts including a freelance programmer and four designers.

EDUCATION

University of the Philippines

BS Computer Science (2000 – 2004)

SKILLS

- Cloud Technology: Architecture and design, Infrastructure, Security, Reliability, Networking
- Problem Solving: Enterprise Architecture, Microservices, Web Development, Application Development, System Administration, Data and AI
- Leadership: Project Management, Domain expertise, Sales, Communication
- DevOps: Programming, Testing, Automation, Deployment, Monitoring

AWARDS

- Microsoft – Sub Awardee (Microsoft Q2 2022 FY23)
- Microsoft – Sub CSU Awardee (Microsoft Q3 2021 FY21)
- Microsoft – APAC Accelerate Award Winners (Microsoft FY20)
- RCG – Employee of the month (Aug 2017)
- TDP – Employee of the month
- High School – fourth honors

CERTIFICATION

- DevOps Engineer
- Azure Security Engineer
- Azure Network Engineer
- Azure Administrator
- Azure Fundamentals
- Azure Data Fundamentals
- AWS Solutions Architect
- Cloudera: CCA Data Analyst
- HTML5 with JS & CSS3
- Professional Scrum Master I
- PHP: Zend Certified Engineer
- Zend Framework Certified Architect
- OpenHack: Containers
- OpenHack: Containers Coach
- OpenHack: DevOps
- OpenHack: Serverless
